

Schuimapparaat

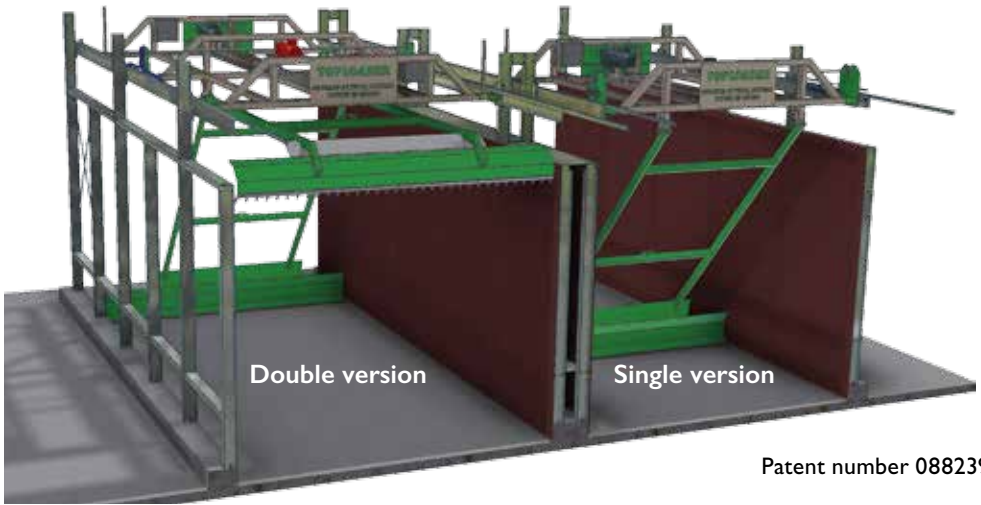

Uniek middeldoseringsysteem

Digitaal afleesscherm

Eenvoudig te bedienen

Automatisch doorvoersysteem

Patent number 0882390

The patented Total Systems Toploader is the economical solution for mass storage and dosage of: peat, soil, wood chips, fertilizer, fibres, sawdust, bark, sand, sludge, etc.

Key Features

- Patented material moving system for the automatic handling of bulk materials
- Variable sizes to suit requirement
- Storage capacity up to 8.0m high
- Width up to 10.0m, length variable
- Moving capability up to 150 m³ per hour
- Light weight construction
- High reliability
- No (extra) wear and tear due to dust or moisture
- Competitively priced compared to moving or walking floors
- Low energy consumption compared to other material handling systems
- Low cost exploitation
